

Peeyush Mishra, Test Lead

Cleveland, United States, +1 2164187962, mishrapiyush27@gmail.com

PROFILE

- With over 13 years of experience as a QA lead, Functional and Automation Test Engineer. I hold ISTQB certification and possess a robust understanding of the Manufacturing and Retail Banking sectors.
- As the Functional Testing Lead, I am accountable for overseeing the testing of software applications throughout the complete software development life-cycle. My role involves actively participating in the planning of software test cycles, developing test scenarios, executing software tests, reporting outcomes to management, and monitoring defects. This position requires collaboration with the Development, Operations, Product Management, and Project Management teams.
- I possess professional experience in developing, implementing, and maintaining automated frameworks and test scripts utilizing Selenium Web-driver and Java.
- Skilled in conducting Root Cause Analysis, managing Defect Triage, and designing Quality Assurance dashboards.
- Experience in comprehensive testing throughout the entire process within Agile Scrum and Waterfall methodologies.
- Overseeing the release of testing projects while engaging with various vendors, clients, and senior delivery stakeholders daily.
- I have extensive experience in Unit testing, Integration testing, System testing, User Acceptance testing, Regression testing, Sanity testing, Ad-hoc testing, and Browser Compatibility testing.
- Equipped with strong problem-solving abilities, willingness to learn, and excellent communication skills. Poised to contribute to team success and achieve positive results. Ready to tackle new challenges and advance organizational objectives with dedication and enthusiasm.

EMPLOYMENT HISTORY

Mar 2024 — Present

Test Lead - Offshore, Cognizant Technology Solutions

Pune, India

- Preparing a detailed test plan that outlines the test objectives, schedule, deliverables, test environment setup, and resource allocation. Also, devising a comprehensive test strategy outlining the overall approach to testing the software application. It encompasses the objectives, scope, test levels, test techniques, and resources required for the testing process.
- Collaborating with the test team to create test scenarios and cases that cover all the possible functionalities and requirements of the software application. Also, ensuring that the test cases are comprehensive and effective and adhere to the test strategy.
- Oversees the execution of test cases, ensuring that the testing process follows the test plan and that the team addresses issues promptly. Monitoring testing progress and providing regular updates to clients and management.
- Reviewing test artifacts, such as test cases, test scripts, and test data, to ensure their quality, consistency and adherence to the test strategy and plan.
- Managing the team by assigning tasks, setting priorities, and monitoring progress. Provide guidance, support and training to the team members, helping them improve their skills and productivity.

Feb 2022 — Mar 2024

Automation Test Engineer, Cognizant Technology Solutions

Halifax, Canada

- Design and develop automated software testing tools, frameworks, and scripts using Java
- Maintain and upgrade existing automation tools, scripts, and frameworks to ensure they continue to meet evolving software development needs.
- Work closely with development teams to identify automation opportunities, develop automated testing plans, and implement automated testing frameworks.
- Create, maintain, and execute automated test cases, scripts, and test suites to ensure software quality and reliability.
- Design and execute automated performance testing to ensure software scalability, reliability, and stability.
- Develop, maintain, and optimize CI/CD pipelines to automate build, testing, deployment, and release processes.
- Monitor automated tests and CI/CD pipelines, analyze results, and identify areas for improvement to ensure software quality and efficiency.
- Document automation processes, tools, and frameworks, and share knowledge with team members to ensure knowledge transfer and consistency.

Junior Automation Test Engineer, Cognizant Technology Solutions

Pune, India

- Learn and understand project requirements, user stories, and acceptance criteria.
- Participate in requirement analysis meetings to clarify testing needs.
- Write, maintain, and execute automated test scripts using Selenium, JUnit, TestNG.
- Worked under senior team members to learn and help develop automation frameworks and libraries.
- Understand testing methodologies and assist in creating reusable test functions.
- Conduct manual testing as needed or as a preliminary step before automation.
- Validate system behavior and results for completeness.
- Identify, document, and report defects or issues found during testing.
- Verify fixes and follow up on defect resolution with the development team.
- Execute automated regression tests, collect test results, and analyze the data for issues.
- Used test management tools to track test executions and results.
- Worked closely with development and QA teams to ensure quality throughout the software development lifecycle.
- Participated in team meetings and contributed to discussions about process improvement.
- Documented test plans, test cases, and test results thoroughly.
- Maintained clear and up-to-date records of testing activities.
- Stay current with industry best practices, tools, and technologies related to automation and software testing.
- Participated in training sessions or workshops to enhance skills and knowledge.
- Provided support to the QA team in troubleshooting issues and generating reports for stakeholders.
- Assisted in other quality assurance activities as required.

Dec 2011 — Nov 2018

Functional QA Analyst, Cognizant Technology Solutions

Pune, India

- Understanding all Business requirements and software specifications by participating in various walkthroughs.
- Wrote and optimized test cases to maximize the success of manual software testing with consistent, thorough approaches.
- Optimized test cases to maximize the success of manual software testing.
- Improved software quality by executing thorough manual UI and API test cases and identifying critical defects.
- Supported agile development methodologies by actively participating in sprint planning meetings and providing valuable input during daily stand ups.
- Assisted developers in reproducing reported issues, expediting their resolution, and improving overall product quality.
- Collaborated with cross-functional teams to ensure seamless integration of software components, resulting in increased system reliability.
- Collaborated with Business Analysts to understand product features, resulting in more targeted and effective testing strategies.
- Monitored resolution of bugs, tested fixes, and helped developers tackle ongoing problems by providing QA perspective.
- Optimized test cases to maximize the success of manual software testing.

EDUCATION

Jul 2006 — Jul 2010

Bachelor of Engineering, Jabalpur Engineering Collage

Jabalpur

Graduated with First Class.

SKILLS

Software Testing
Project Management
Functional, Regression and User Acceptance Testing
Defect Tracking and Reporting
Defect Management

Test Documentation and Reporting
Test Planning
Test Design and Execution
Manual and Automated API Testing
Test Automation

TOOLS	JIRA, HP ALM, QTest, ServiceNow, Visio, Savigent, Postman, Fiddler, Jenkins and Github	
AUTOMATION TOOLS AND FRAMEWORK	Selenium Webdriver, TestNG, Cucumber with Java	
DATABASE	SQL Server	
COURSES		
Oct 2011	ISTQB Foundation, ISTQB	
Jul 2014	JIRA, Cognizant Technology Solutions	
Jun 2015	Selenium Webdriver, Cognizant Technology Solutions	
Jul 2017	API TESTING, Cognizant Technology Solutions	
Mar 2018	Rest Assured API testing, Cognizant Technology Solutions	
VISA AND WORK AUTHORIZATION		
Mar 2025 — Mar 2028	H4 EAD	United States
Jun 2022 — Jun 2028	Work Permit	Canada
